November 14, 2022

22nd CCUF-CCDB Workshop in Toledo (Day 1)

Thursday 10 November		
	Buenavista 1	Buenavista 2
9:00 - 9:30		
9:30 - 10:00		
10:00 - 10:30		
10:30 - 11:00		
11:00 - 11:30		
11:30 - 12:00	iTC Chair Meeting - Brian Wood	
12:00 - 12:30		
12:30 - 13:00	LUNCH	
13:00 - 13:30	Buenavista 3 + Foyer	
13:30 - 13:45	Welcome	
13:45 - 14:15	Big Changes Coming - Michael Vogel, Mike Grimm	
14:15 - 15:00	CCUF over the next 2 years - Lachlan Turner	
15:00 - 15:30	Break	
15:30 - 16:00	Joint Session	
16:00 - 16:30	- iTC Updates - Question & Answers	
16:30 - 17:00	- CCDB Updates - office hours	
18:00 onwards	Happy Hour - Hotel bar	

22nd CCUF-CCDB Workshop in Toledo (Day 2)

Friday 11 November			
	Buenvista 1	Buenvista 1	
9:00 - 9:30	Biometrics iTC - Brian Wood	ND iTC - Kristy Knowles (Closed Session)	
9:30 - 10:00			
10:00 - 10:30	NIAP Automation – Kevin Gallicchio		
10:30 - 11:00			
11:00 - 11:30	Break		
11:30 - 12:00	Mobility TC – Kevin Gallicchio	ND iTC - Kristy Knowles (Closed Session)	
12:00 - 12:30			
12:30 - 13:00	LUNCH Buenvista 3 + Foyer		
13:00 - 13:30			
13:30 - 14:00			
14:00 - 14:30	Mobility TC – Craig Pezold	HCD iTC - Kwangwoo lee	
14:30 - 15:00			
15:00 - 15:30	Break		
15:30 - 16:00			
16:00 - 16:30			
16:30 - 17:00			

22nd CCUF-CCDB Workshop in Toledo (Day 3)

Monday 14 November	
	Buenavista 1
9:00 - 9:30	ISO Updates - Kwangwoo Lee
9:30 - 10:00	CCUF Tools Training - Brian Wood
10:00 - 10:30	
10:30 - 11:00	Break
11:00 - 11:30	EUCC & CRA - Miguel Banon
11:30 - 12:00	
12:00 - 12:30	
12:30 - 13:00	LUNCH
13:00 - 13:30	Buenavista 3 + Foyer
13:30 - 14:00	Open discussion iTC, CCRA etc - Brian Wood
14:00 - 14:30	
14:30 - 15:00	How do we make SDs more consistent across iTCs or do we want to - Michael Vogel
15:00 - 15:30	Closing - Kwangwoo lee
15:30 - 16:00	Break
16:00 - 16:30	DSC iTC (Closed session)
16:30 - 17:00	

CCUF Workshop
Toledo Spain

- **CCUF Management Group**, for organizing the workshop
- **Cnxted Event Media Corp**, for supporting our workshop, providing facilities and working with the venue managers. In particular:
 - Bill Rutledge
 - Nikki Princie
 - Andrew Baranich
- **Hotel Eurostars Palacio Buenavista**
 - Oscar
- **YOU**, for arriving early to attend the workshop

GRACIAS!
THANK YOU!

CCUF Toledo Workshop

- Opportunities for Face to Face meeting are valuable
 - TCs meeting and Joint Session
- Participate in the supporting projects
 - Give your support to the CCDB, ISO and other relationships
 - Contribute to the general discussions on PPs and ancillary topics

Joint Session

DSC iTC

DBMS iTC

iTC Chair Update

CC in the Cloud

CCUF Responses to CCDB Questions

CCDB Updates and responses to CCUF Questions

Office hours

Welcome (Petra Manche)

What's changed?

- We are meeting in person 😊
- iTCs and workgroups continue to grow
- Certifications are becoming more automated
- EU CC is on the way
- Revision to ISO/IEC 15408 and 18045 is complete; ISO/IEC 22216 too
- Possible adoption of ISO/IEC 15408:2022

Certifications and automation

- FIPS 140 is moving towards automation for
 - Algorithm testing (CAVP)
 - Entropy quality analysis (ESV)
 - Ingesting data from module reports (WebCRYPTIK)
 - Investigating automated review of module testing and document (ACMVP)
- Similar developments in Common Criteria community
 - Evaluation laboratories offering test harnesses and automation
 - GitHub tooling and documentation templates
 - NIAP developing a schema for NIAP protection profiles

→ See "Advances in the Use of Common Criteria: Tool Support" at ICC, November 17 9:00 – 10:30

→ "Advances in the Use of Common Criteria: Select Topics" at ICC, November 16 11:00 – 12:30

→ "Meeting Customer Requirements: Process Improvement" at ICC, November 17 10:45 – 12:15

Possible adoption of ISO/IEC 15408:2022?

- Current version of CC is Common Criteria v3.1 Release 5
 - Authored by CC Development Board
 - Maintained by CC Maintenance Board
- ISO/IEC 15408:2022
 - Authored and maintained by ISO/IEC SC 27 WG3
- If CC management decided to adopt ISO/IEC 15408:2022, would need to consider
 - Updates to CC operating documents
 - Revisions to protection profiles and supporting documents
 - May have a long transition

iTCs and workgroups

- Last big set of changes to CC led to establishing iTCs and workgroups to develop protection profiles and assurance activities
- It has taken a while, but there are iTCs for
 - Application Software
 - Biometrics
 - Database Management
 - Dedicated Security Components
 - Full Disk Encryption
 - Hard Copy Devices
 - Network Fundamentals and Firewall
 - USB Portable Storage Device
- A newish workgroup for "CC in the Cloud"

EU CC is on the way

- Arrival of EU CC
- Transformation of SOGIS
- A major topic here in Toledo
 - "EU CC & CRA", Monday session
 - "Updates from Schemes and iTCs: EU Updates" at ICC, November 16 9:00 – 10:30
 - "CC In New Domains: New Applications" at ICC, November 16 15:30 – 17:00

Updated ISO standards

- "EU CC & CRA", Monday session
- ICC, November 15, plenary session

Big Changes Coming – Michael Vogel / Mike Grimm

CCUF

What should we do over the next few years?

CCUF Over the Next Two Years

One Word

Once word to describe the next few years:

- Turbulent
- Automation
- Flux
- Interpretation

What does the CCUF do well?

- People Networking
- Collaborating
- Information sharing
- Creating community to work together
- Providing support for working groups / TCs
- Humanizing stakeholders
- In-person working meetings – effective to get work done
- Diversity of perspective
- Without CCUF there would be no iTCs

What does CCUF not do well?

- Communication – hard to find things
- Coordination
- Engagement / marketing
- Internal participation – getting more of our members to be active
- Discoverability of information
- End user participation - trying to make the CC relevant
- Spread the word about CC
- Information sharing – onboarding people to the CC
- Hard to figure out what iTCs are doing / where they are at
- Getting broader participation

What should we prioritize?

- Frequent getting together to share knowledge between stakeholders
- Communication / Regular updates
- Organizing existing information
- Supporting Automation
- Support for CC in the Cloud
- CC recruitment / training / engagement
- How to get consistency for the same requirements across PPs (e.g. TLS, X509 etc.)

CCUF over the next 2 years (Lachlan Turner)

asukert@redhat.com

Current Issues

The iTC has worked on the following items:

1. Complete Evaluation Activity Development
2. Reviewing, comparing, and collaborating with OTHER iTCs
3. Planning setup of an HCD Interpretations Team
4. Establishing Interpretation Team (HIT)

HCD iTC Update (Kwangwoo Lee)

ORACLE

DBMS iTC Update CCUF November 2022

Maureen Barry
DBMS iTC chair
Oracle Security Evaluations - Global Product Security
November 10, 2022

Who are we?

The Database Management System (DBMS) international Technical Community has representatives from Industry, Government agencies, Consultants and Common Criteria Test Laboratories

- The team is comprised of 33 members including 19 active members
- 13 of us work collaboratively at regular meeting attendance
- Scheme participants include Sweden, Germany and Japan

Highlights

By iTC we have the following updates:

- Latest Database Protection of Self-Managed Cloud Data (Self-Managed Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)
- Database on Public Cloud (Public Profile)

The DBMS iTC has published their collaborative Protection Profile and Supporting Documents v1.1.

Please visit the DBMS iTC website for access to published documents.

Repeat of Developer's Tests: The evaluator reopened the suite of the developer's tests which were based on the testing requirements detailed in the Supporting Document for the collaborative Protection Profile for Database Management Systems cPP, 7 April 2020, Version 0.17.

Future Activity

- Supporting CC in the Cloud activities
 - Mapping cPP and Supporting Document to cloud implementations
- Sunsetting of the German BSI DBMS PP v2.12
 - Valid until 04 April 2027
 - Sunsetting once the new DBMS Supporting Document is approved which won't happen until a first evaluation
- Another cPP version?
 - One at a time

DBMS iTC Update (Maureen Barry)

CC in the Cloud update Virtual CCUF Workshop November 2022

Brandon Harvey
Principal Security Analyst, Oracle Security Evaluations
Technical Writer, CCitC TWG

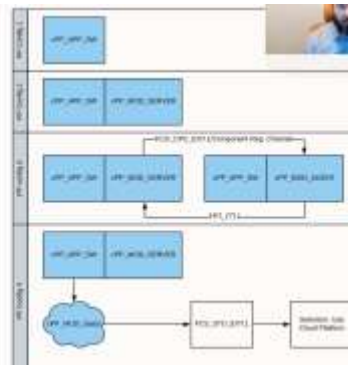

What is our goal?

- The current standard does not allow for service evaluations. We are focused on **product** evaluations in Cloud deployments.
- To enable Common Criteria assurance for Cloud use cases
 - Provide guidance and documentation to support this effort

Guidance for PP Authors

- Process to develop PP modules for CCitC using the Threat Model in the ESR
- Modular design can be enforced by PP Configuration

Who we are:

- The team is comprised of 58 members including about 15 active members

Mapping Evaluation Frameworks

- There is a bilateral relationship between Cloud authorization providers (FedRAMP, C5, CSA, etc) and CCITC
- Controls can be mapped from the Cloud Service Provider down to the TOE.

Long term or Aspirational Goal-a Reminder

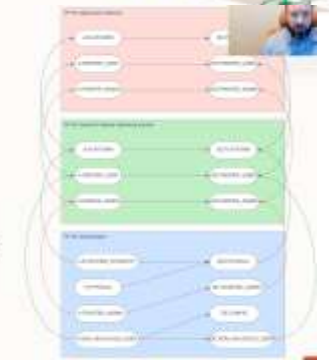

- CC for ICT products running in cloud (not CC for services or cloud providers)
- Providing assurance for products in a cloud scenario (not for the cloud administrative functionality—this is what the Trusted Provider part will cover)
- Obtain endorsement from the CCDB as an ITC
- Have the CCRA formerly accept solutions to evaluate IT products in the cloud
- Provide guidance to evaluate a product/service in a cloud environment:
 - Short term via modules/supporting documents
 - ~5 years--Next version of Common Criteria ISO standard (15408)

Project Timeline

Trusted Platform Concept

- Uses existing PPs to compose a trusted platform "stack"
- Can be formed from HW Root of Trust to Application Layer
- Relies on existing PP Assumptions and Objectives

How to Contribute

- Join the discussion - <https://github.com/CCitC>
- Submit Issues - <https://github.com/CCitC>
- Come to the meetings - Planned offsite
- Check the website for developments

WHERE WE ARE GOING

NDcPPv3.0 draft

- 03 OCT 2022 - Draft of 3.0 released for public review
- Public Review 4 weeks, through 30 OCT 2022
- Target release by end of Jan 2023

NDcPPv3.0 links

WHERE WE ARE GOING

NDcPPv3.0 major changes

- Added TLS v1.3
- Removed TLS v1.1 / DTLS 1.0
- CCMB comment resolution from their review of the Supporting Document v2.2
- Added ALC_FLR as an optional additional assurance component to better align with EUCC
- SSH SFRs removed, NIAP's Functional Package now required for SSH
- Updated references to standards (RFCs and NIST SPs)
- Removed support for published hash as a means of providing software integrity
- Address formatting comments
- 1st document updates done in GitHub (AsciiDoc)

GITHUB TRANSITION

- Created ND-ITC Github Org
 - Added teams by subgroup
 - Added permissions/rules by team
- Converted MS Word docs to AsciiDoc
- Created branches by subgroup
 - Added branch protections
- Utilized Github pages to develop [NDcPPv3.0](#)
- Subgroups are being trained while also developing the NDcPPv3.0
- Created [ND-ITC](#) project for tracking purposes

GITHUB STATS

- 23 collaborators
- 12 different organizations
- 57 issues opened
- 66 pull requests (PR) submitted

JOIN US

2022 Meeting Schedule - Nov 18, Apr 20, Jul 20, Oct 19 (2nd Tuesday of the month)

Update from 2022/08

- App SW cPP, SD + modules released (2022/04)
- Looking for Scheme Support
 - Received feedback, from a scheme, to be reviewed and incorporated
- Working on adding Mac OS ?? Platform
- Adding mobile platforms on deck.

Question from CCUF on CCDB (Michael Vogel)

Questions from CCUF on CCDB for joint CCDB-CCUF

meeting at CCUF WS, November 2022

Michael Vogel (on behalf of the CCUF MG), V0.2, 06.10.2022, public

Introduction

This is a collection of questions from the CCUF to the CCDB for discussion during the joint CCDB-CCUF meeting at the CCUF WS, November 2022. Questions have been collected via a survey that has been initiated by the CCUF MG on [OnlyOffice](#). This document is handed over on behalf of the CCUF MG to the CCDB.

Topics

The questions are grouped into different categories. The order does not reflect any prioritization.

Questions related to the revised CCRA, EUCC, iTCs, cPPs, SDs (ITC)

This category summarizes all questions related to the revised CCRA, iTCs, cPPs, SDs unless covered in another category

No.	Question	Answer
ITC.22_01	Can the CCDB please provide an update on the status of the EUCC?	<p>Answer during virtual CCUF WS (2021/10): The CCDB is providing an update to the CCUF at the joint session on EUCC.</p> <p>Answer during virtual CCUF WS (2022/05): The CCDB has continued discussions with the commission and the general status is more or less the same, but details are being refined. We expect to provide more details at the next joint meeting.</p> <p>Answer during CCUF WS (2022/11): The CCDB has continued discussions with the commission and the general status is more or less the same, but details are being refined. An informal analysis of the differences between the CCRA and the EUCC is</p>

the basis of our discussions and is provided here as an annex. Additional details will be provided after the Implementing Act is published. The EU members are meeting in two weeks, at which point we should have a better estimate on when the Implementing Act will be published.

ITC.22_01b
During the last CCUF Workshop the CCDB has told the CC community, that for the upcoming EUCC scheme the use of AVA_VAN and ALC_FLR will be mandatory. This will affect all (c)PPs for use within EUCC which don't include AVA_VAN and ALC_FLR. While for strict and demonstrable conformance (c)PPs the missing assurance requirements could be added, (c)PPs with exact conformance claims would become unusable for EUCC (in particular NIAP PP's like the widely used MDF PP). Are there any plans to overcome this issue?
While AVA_VAN is contained in many (c)PPs today, the situation is different for ALC_FLR. One very simple way of fixing this issue would be to create one common Module just for ALC_FLR and allow to use it with all (c)PPs that are missing ALC_FLR. This way, the existing PP's could remain untouched.

ITC.22_01c (corrected)
Within EUCC certificates on AVA_VAN level 'substantial' which maps to AVA_VAN.1 or .2 are expected to be issued by private CABs. This affects many NIAP PP's and cPPs. What is the status about the CC Recognition Arrangement regarding the acceptance of CC certificates issued by private CABs? As EUCC is expected to be enacted within 2022, this is an urgent issue to be resolved. Otherwise, CC certificates issued within the EU based on many PP's and cPPs will not be covered by the CCRA and

Answer during virtual CCUF WS (2022/05):
<shortened>

A private CAB is already issuing certificates within Netherlands and is authorized by Netherlands CCRA participant.

CCRA members have continued discussions on CCRA mutual recognition in relation to EUCC, and do not have

	might not be accepted outside the EU. Of particular interest would be how certifications in the EU would be affected for products that are intended to be listed on NIAP's PCL.	<p>update to provide at this time. However, it is likely that EUCC will not enter into force immediately upon adoption, but after a period of 1-2 years.</p> <p>NIAP will provide assessment on the effect of products intended to be listed on the PCL after these discussions conclude.</p> <p>Answer during CCUF WS (2022/11): Additional details will be provided after the Implementing Act is published. The EU members are meeting in two weeks, at which point we should have a better estimate on when the Implementing Act will be published.</p> <p>NIAP will provide assessment on the effect of products intended to be listed on PCL after these discussions conclude.</p>
ITC.22_03	Can you please provide an update about the update of the iTC process?	<p>Answer during virtual CCUF WS (2021/10): A more simplified iTC process is under discussion in the CCDB meetings, and an update is expected soon.</p> <p>Answer during virtual CCUF WS (2022/05): A more simplified iTC process is under discussion in the CCDB meetings and on the agenda for tomorrow.</p> <p>Answer during CCUF WS (2022/11): The simplified iTC process is entering its final review process.</p>

Questions related to the Common Criteria themselves (CC)

This category summarizes all questions related to the common criteria themselves

No.	Question	Answer
CC.22_01 (N)	Can the CCDB talk about the plan to adopt and roll out the new version of CC? a) What is the strategy? b) Will there be a transition period? c) When can we expect it to go into effect?	<p>Answer during CCUF WS (2022/11): The CCDB has recommended the approval of CC:2022 and CEM:2022 derived from ISO/IEC 15408:2022 and 18045:2022.</p> <p>There will be a transition period. The CCDB has agreed to the requirements at a high level and recommended for approval.</p> <p>The CCMC is reviewing both on 14 November and a formal vote will be forthcoming.</p> <p>The transition period by which all evaluations and PP's must use the new version will be announced with the publication of the CC:2022 and CEM:2022. More detailed guidance is under review and will be announced later.</p>

Questions from the CCDB to the CCUF (DB)

This category summarizes all questions from the CCDB for the CCUF

No.	Question	Answer
DB.22_01	When will the DSC, FW NW, and USB iTCs provide adjudication of SD comments from the CCDB?	<p>Answer during CCUF WS (2022/11): <answer will be provided during the Joint Session></p>

Topics requested for further discussion (DISC)

This category summarizes all topics requested for further discussion

No.	Question	Answer
DISC.22_01 (N)	I would like to see more consistency and formality in the test descriptions in the SDs. I think this would help ensure consistency and would help us in our quest for more automation.	<p>Results from the CCUF WS (2022/11):</p>
DISC.22_02 (N)	Is there any formalized training regarding Common Criteria? Video on demand? Webinars? (it is not clear whether the author of the question expects this to be free or charge or not)	<p>Results from the CCUF WS (2022/11):</p>

CCRA/EUCC Coexistence WG

Nov 2022

EUCC Implementing Act

Finalising EUCC Implementing Act

- Request from European Commission to Enix
- EUCC v1.0
- EUCC v1.1
- EUCC v1.2 transmitted to the EC
- Working document
- (draft) Internal EC prep
- Draft Implementing Regulation
- Consultation
- Adoption
- Entry into force

← We are (still) here

← Expected Q7 2022?

Differences between CCRA and EUCC Scheme

CCRA	EUCC
Substantial issues certificates (or sub-issues)	Conformance within issue certificates (or level substantial issues, there is no level based)
Mutual recognition up to level (M2) (substantial)	Mutual recognition for all levels
National schemes with only one (1) CAB that is allowed to issue certificates	A single European scheme with multiple CABs (also per ITC) that are allowed to issue certificates
Decentralised their arrangements (MAs) between participants and that CABs is responsible for the adherence to the CCRA requirements. → testing results	Centralised their arrangements (MAs) between participants, maintaining and enforcing rules of CCRA and EUCC activities. From stakeholders between CABs, but only the level High → non-binding results
ITC's (SDs) in order to add to a national scheme in CCRA are licensed by the CC to CCRA	ITC's (SDs) in order to operate in the EUCC scheme at substantial level are accredited by the National Accreditation Body (NAB) pursuant to Regulation (EU) 765/2008. ITC's (SDs) can extend operation at the High level if authorized by their NAB.

Future Revision of ISO/IEC 15408 & 18045

WG Recommendation 3. PWI registration

ISO/IEC JTC 1/SC 27/WG 3 resolves to request SC 27 to register the following PWI:

Title (and S.No, if any)	Project Editors' Name (Country)	WG	Project Number
Investigation of the feasibility and implementation of changes to ISO/IEC 15408 and ISO/IEC 18045	Tony Boswell (GB) * Yao Jiansong (CN) * Caroline Lavarello (FR) * Kwangwoo Lee (KR) * David Maena (GB) * Franco Pizzi (DE) * Jade Stewart (US) * Heebong Cho (KR) * Hai Chen (AU) *	3	

*Co-Editor

WG Recommendation 4. Cancellation of Project

ISO/IEC JTC 1/SC 27/WG 3 resolves to request SC 27 to cancel the following project listed below:

Title (and S.No, if any)	Justification
PWI 1677 Roadmap for the maintenance of ISO/IEC 15408 and ISO/IEC 18045	Document to become an internal WG3 working document while the work that it describes will be progressed ahead via PWI.

Publication - ISO/IEC 15408, ISO/IEC 18045

- Status: Published
- Publication date: 2022-08

Resolution D Thanks to the Experts, Rapporteurs and Editors

ISO/IEC JTC 1/SC 27 WG 3 thanks all the SC 27 WG 3 experts, rapporteurs, editors and acting rapporteurs for their efforts and continued support in progressing the 17 WG 3 projects.

ISO/IEC JTC 1/SC 27 WG 3 especially thanks the following editors for their efforts in following documents through the standardisation process:

Editor	Project	Title
Audriuskevicius Elzbieta * Lavarelli Carolina * Stewart Jade * Toussaint Guillaume *	15408-1	Information security, cybersecurity protection — Evaluation criteria for IT s 1: Introduction and general model
Muthambi Nicholas * Shi Hongcong * Stewart Jade *	15408-2	Information security, cybersecurity protection — Evaluation criteria for IT s 2: Security functional components
LEE SOOHYEUN * Nosted Christian *	15408-3	Information security, cybersecurity protection — Evaluation criteria for IT s 3: Security assurance components
Boswell Tony *	15408-4	Information security, cybersecurity protection — Evaluation criteria for IT s 4: Framework for the specification methods and activities
Choi Heebong * Stewart Jade *	15408-5	Information security, cybersecurity protection — Evaluation criteria for IT s 5: Pre-defined packages of security requirements
Lee Kwangwoo * Martin David *	18045	Information security, cybersecurity protection — Evaluation criteria for IT s Methodology for IT security evaluation

Declaration

PWI Registration

PWI: Investigation of the feasibility and implementation of changes to ISO/IEC 15408 and ISO/IEC 18045

- A new preliminary work item titled "Investigation of the feasibility and implementation of changes to ISO/IEC 15408 and ISO/IEC 18045" proposed by the associated WG 3 roadmap has been proposed.
- The scope of this PWI covers any work needed to gain consensus within WG 3 for both the contents and the implementation of the changes.
- It will provide the overall coordination and project management needed to ensure a coherent set of changes and smooth, successful set of revision to the ISO/IEC 15408 and ISO/IEC 18045.
- WG 3 would welcome inputs from the CCUF at any point and, in particular, any suggestions arising from their use of the updated standards.
