San Diego Action Items

PWG Actions

1. Scott Isaacson to kick off reflector discussion on standard inter/intranet printing protocol
2. Don Wright to kick off discussion on standard printer adapter card
3. Don to send a "Going Going Gone" notification on 1997 meeting dates and places.

PMP Actions

1. Channel descriptor - Lloyd will open discussion on the reflector aimed at deciding between the simple port number object or an expanded solution that fully addresses all the related requirements.
2. Everyone who has implemented the Printer MIB (RFC1759) review for support of Optional Groups and report if any optional groups that pertain to implemented function were not done.
3. Ray Lutz will post his submission for mapping prtInterpreterLangFamily to MIME type.
4. Ray Lutz will review the MIME registration process and report to the PWG.
5. Tom Hastings will post his proposal for new prtInterpreterLangFamily which was distributed in hardcopy at SanDiego.
6. Tom Hastings to consider request from Harry Lewis to change prtInterpreterLangFamily JCL to XJCL to avoid conflict with IBM's JCL.
7. Randy will fix grammar for prtInputMediaFormsParts
8. Randy will change last sentence on pg.39 (localization general) to: "Note that this object does not apply to localized strings in the prtConsole group or any object that does not explicitly state it is localized by prtGeneralCurrentLocalizatin".
9. Randy change printer marker colorant value from 127 to 255 max size.
10. Randy - printer input manual feed timeout - add -1 timeout infinite -2 unknown.
11. Randy - Change the wording on pg. 45 so -1, not 0, is used in prtInputDefaultIndex when there is not system wide default. Note that the actual default at any particular moment, in this case, would be that described by the default PDL (ie. other). Same for output pg. 52.
12. Randy - Change Cover status TC to cover not door.
13. Randy - Add prtAlertChangesCritical to the alert group as prtAlert.2 and add prtAlertChangesAll as prtAlert.3
14. Randy - Move start of 2.2.13.2 so that status definitions apply to printer and sub-units as described in the PMP minutes.
15. Randy - Embed Port9100 and AppSocket clarifications.
16. Randy to figure out proper wording of definition of Available (not-broken)
17. Bob Setterbo initiate review of Min/Max access including a R/W object audit.
18. Chris Wellens has indicated, off line, the potential to host another bake-off. Randy will contact Chris Wellens to see what the possibilities are.
19. Lloyd to check with IANA on progress of Binnur's requests, re-iterate Binnur's submission and continue to submit any new IANA items.
20. Lloyd to continue working the IETF re-charter issues
21. Randy to post Printer MIB draft update by 9/20 in time for review prior to NYC.
